

- Use this food web to create 3 different food chains. Make sure to leave space to label each organism.
 - 1st label is Producer; Primary consumer; secondary consumer; tertiary consumer; quarternary consumer; apex predator
 - 2nd label should be **autotroph or heterotroph**
 - 3rd label should be **producer; herbivore; omnivore; or carnivore**
- Each organism needs to be used at least once.
- All food chains should end at the apex predator
