

Astrobiology Assignment Part 2

Instructions:

- Imagine you are an Astrobiologist working for NASA. Write a proposal for a mission to find life in our Solar System.
- Be creative! Add color! Turn in on Canvas! Be sure to use information you learned from the Part 1 article and your solar system mission that you researched earlier this year. If you have questions, ask Mr. Hyatt.
- *When you draw, it can be in Microsoft Paint, or in your science journal. If you choose your science journal, insert a picture of your drawing.*

Mission Name (include why you chose the name) and **Logo:** (you have to draw one in paint, then insert it here)

Introduction: (3 sentences)

Location to explore:

Science Instrument #1 and function: (2-3 sentences)

Science Instrument #2 and function: (2-3 sentences)

Detailed Mission Description: (1-2 paragraphs)

What you hope to learn/discover: (1 paragraph)

Background information/what you already know about the location: (1-2 paragraphs)

Sketch of spacecraft with instruments labeled: (If you want to draw this, you can, then insert the picture to box below.)
