

Marine Habitat Travel Brochure

Choose one of the marine habitats that we have discussed in class:

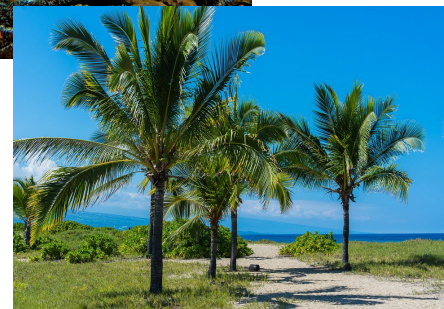

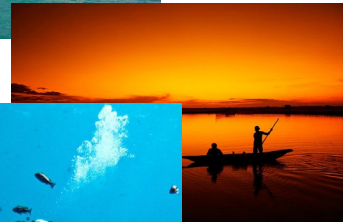

- Coral Reefs**
- Deep Sea Vents**
- Salt Marshes**
- Seagrass Flats**
- Kelp Forests**
- Beaches/Dunes**
- Mangrove Swamps**
- Tidal Flats**
- Pelagic Waters**

Choose a location on Earth where you can visit your habitat
Hint: Your Ocean Book has many examples of each habitat

Create a Google Slides presentation with the following:

- Name of Location, Country/Ocean/Sea
- Photos of the location/habitat/organisms
- Type of habitat
- Cost of visiting - Hotels/Flights/etc.
- Examples of animals that are found there
- Examples of plants/algae that are found there
- Activities to do once you are there (ex. Fishing, boating, scuba diving etc)
- Environmental threats to the habitat/location
- Convince somebody trying to decide on a destination to head to your habitat
- Use the internet and travel websites as well as your Ocean textbook to find the info.
